

Dove Tail / Interlock:

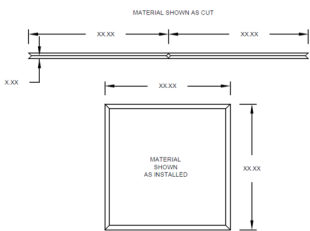

- Interlock designs that allow for connecting strips at the corners
- Minimizes material waste
- Available in squares, rectangles, and circle gasket shapes

Custom Gaskets:

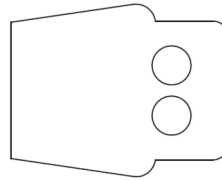

- Customizable size, shape, and material
- Can accommodate complex shapes and designs
- Provides a seamless seal

Pop Out Gasket:

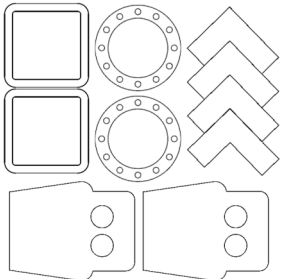

- Seamless hinged gasket to reduce the risk of leaks
- Reduces material waste of traditional gasket
- Available in squares, rectangles, and circle shaped gaskets

Rapid Prototyping:

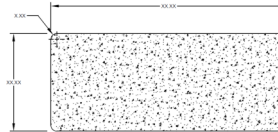

- Custom foam parts made with CNC machine
- Produces elaborate geometries and designs
- Can hold a tolerance of 0.01" depending on the material

Nested Kit:

- A collection of custom shapes in a single kit
- Ensures efficient assembly and usage of components
- Optimizes inventory management space

Sheets:

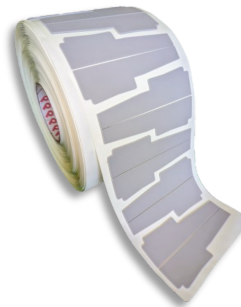

- Custom sheets of any size
- Radius or 90° corners
- Applications include non-slip material for steps or ladders, matting for workplaces, shelving, or for gasket cutting

Die-Cut Separate:

- The custom pieces are cut all the way through the material and liner paper
- Finished products are completely separate from each other

Kiss-Cut Roll:

- A die-cut that creates cuts on a material without penetrating the liner paper
- Finished products are connected by liner paper
- Option of removing the waste webbing of the roll or leave it intact
